- Git
- Framer motion
- Azure Devops
- SEO
- Performance optimization
- Software Development Lifecycle (SDLC)
- Cross-functional Team Leadership
- Stakeholder Engagement & Management
- Communication
- Microsoft Teams

PROFESSIONAL EXPERIENCE

Voyatekgroup | Frontend Architect   **Aug. 2024 till date**

- Managed and provided architectural oversight for 4 distinct frontend development teams, impacting over 5 developers and 2 projects.
- Reduced critical application load times by 70% through strategic performance optimizations, including code splitting and image lazy loading.
- Contributed to a 50% increase in frontend team growth through active involvement in the recruitment and onboarding process, securing top-tier talent and streamlining candidate assessment.
- Drove significant improvements in code consistency and maintainability by establishing and enforcing stricter coding standards, integrating automated linting/formatting, and leading comprehensive code review processes.
- Championed and documented frontend architectural best practices such as ADRs, ensuring consistency and scalability across all development teams.

Voyatekgroup | Frontend Developer   **Dec. 2023 - July. 2024**

- Developed and maintained high-performance web applications using React and Next.js, delivering user-friendly and responsive interfaces.
- Spearheaded the development of a key application that contributed to a 20% increase in company revenue by enhancing user experience and optimizing performance.
- Collaborated closely with cross-functional teams, including designers, backend developers, and product managers, to deliver cohesive and scalable solutions.
- Implemented best practices in coding, testing, and version control, fostering a culture of continuous improvement and innovation within the team.

Sterling Bank | Software Developer   **Feb. 2022 - June. 2023**

- Collaborated with the UI/UX designer through the design process to craft the best user experience.
- Spearheaded the creation of a custom admin dashboard with Vue.js for a housing scheme project that would enable the stakeholders to provide better housing support to tenants.
- Collaborated with product managers to craft the best user experience alongside working with backend developers, product owners and major business stakeholder
- Implemented best practices in coding, testing, and version control, fostering a culture of continuous improvement and innovation within the team.

Codedevents | Frontend Developer   **Jan. 2023 till Nov. 2023**

- Integrated third-party APIs including Paystack to enable secure online payments.
- Implemented Google Analytics and Tag Manager to track user behavior and measure the success of marketing campaigns.
- Worked closely with clients and management to understand their requirements and translate them into functional UI/UX designs alongside the UI designer using Figma.
- Pioneered multi-channel marketing initiatives supporting product debut, leading to a 35% uptick in customer acquisition and enhancing overall business growth by 15%.

Quiett | Founder, Frontend Developer   **July. 2021 – till date**
- Launched the Quiett Platform and its products. Managed the team to deliver a world class web application with the best user
  experience.
- Gather product evidence through benchmarks, demos, case studies, and testimonials, working closely with the product marketing team on a synthesis of solutions, frequent iteration to customer needs and signing new partners.
- Represent Quiett online, at events and engage with user to retrieve quality feedback and improvement on the web application
- Developed custom reusable components using Vue.js to improve development efficiency and code quality.

EDUCATION
- **B. TECH – Entrepreneurship and business studies |** Federal University of Technology, Minna **– Sept 2021**
